

Christian Treber - Customer References

Next Generation-CRM (T-Systems Enterprise Services)

“Christian is the epitome of what I would hire in a good consultant: flexible, seasoned in multiple technologies, hardworking, a fast learner, positive, team player ...
I would welcome the opportunity to work together again.”

Stuart Burgess, Enterprise Architect at Magyar Telekom, September 2013 (original)

BMW/Mini Audit-Tool (infas TTR)

„With the help of the consultant we were able to complete a strategically very important project to the fullest satisfaction of our customer. Architecture and quality of the developed software will enable its reuse in future projects.

It wasn't the professional qualities alone that we appreciated. The consultant was able to lead and motivate his team while facilitating easy transition back into self-guided work at the right time. Knowledge transfer to our employees was optimal.

Rarely – actually never before – we have found these qualities at this level of perfection.“

[Dr. Karin Haese](#), Senior Project Manager for Management & Controlling-Research [infas TTR GmbH](#), January 2004 (confirmed by [Gulp](#)). See [Somo-Consulting](#) (translation)

Trading-System for Swaps and Repos (Dresdner Kleinwort Wasserstein)

“Christian's technical abilities are clearly excellent. The ease and rapidity with which he became a part of the group was remarkable. In a very short space of time he had assimilated the problems within our rather complex, multi-layered system and proposed, documented and coded innovative solutions.

The quality of his work exceeds expectations of the client. He is competent and professional, and whilst adding the good humor and candor that both makes him a great person to work with and earns him the respect and friendship of colleagues.”

Dr. Matthew Pontefract, Project Manager, January 2003. See [ReThought Solutions](#) (original)

Workflow Management System – Technical Infrastructure (T-Systems Enterprise Services)

„The consultant was able to get into the very complex nature of the 10 year old system within a very short time frame. As a result over 600 use cases were consolidated and restructured in a well-arranged manner.

In addition to his assignments the consultant developed a tool out of his own initiative to import use cases automatically into the target system. In comparison to the originally planned solution the tool helped to significantly reduce effort and risk. We continually build on and extend the tool.“

Diplom-Informatiker Christian Mongin, Service Process Manager, T-Systems Enterprise Services, Project Manager Workflow Management System Technical Infrastructure (translation)

Wholesale IT-Architektur (WITA) (T-Systems Enterprise Services)

„Mr. Treber possesses broad knowledge of architecture and design, has excellent command of applicable methods and tools (UML, Enterprise Architect), and has the ability to document and present complex subject matter in a clear and easily comprehensible way.

The consultant's approach is goal-oriented, effective, and efficient. We always have been very satisfied with the results of his work.“

Dr. Michael Mehl, Senior Solution Architect, T-Systems Enterprise Services, Chief Architect WITA for Business Logic Wholesale (translation)

Intranet Search Engine (Dresdner Bank)

„We would like to confirm that we are very satisfied with the work results delivered.

Even under difficult and complex circumstances and tight time constraints our quality standards and expectations were always met. His professional knowledge is extensive, which kept ramp-up time to a minimum.“

Theo Saleck, Department Director Dresdner Bank, January 2003. See [Saleck Unternehmensberatung](#) (translation)

Business Process Consulting for Messe München (GENT)

„The consultant is one of the most qualified project managers, planners, and developers of modern software I have ever worked with. He worked for GENT from 1994 to 1997 in a fixed position as the lead programmer of a document management system (DMS) standard software that we sold to a number of clients.

I would like to especially mention his competence, and friendly, coaching personality.“

Wolfgang Hinzert, CEO GENT GmbH, January 2003 (confirmed by [Gulp](#); translation)

Product Whitepaper „aurigatec M36“ (aurigatec)

„Thank you very much for the competent and fast work. We are very satisfied with the style and content of the document.“

Elias da Silva, CEO [aurigatec Informationssysteme](#) GmbH, April 2003 (translation)

Study for the Improvement of IP Service Quality (ARCOR)

„Super, thank you very much for the good work! Thank you for this great achievement!“

Armin Lotz, Project Manager, March 2000 (translation)

Internet and Intranet-Clients for the „FunCard“ Product (Deutsche Post)

„The License and Motif Manager has left a professional impression with us. We are thrilled! Thank you very much.“

Customer Project Manager, November 1999 (translation)
